PROJECTS

Mivlet | AI-agent workspace

Jun 2026 - present

React | TypeScript | Tauri | Rust

Built a provider-neutral desktop workspace for conversations, configurable agents, persistent memory, files and connected tools. Users choose their AI provider and model, manage access and retain workspace data locally.

Memvella | Memory & routine companion

Jun 2025 - present

Next.js | TypeScript | Convex

Secured £500 from Surrey's Propeller Fund and £1,000 from the Cube Fund through competitive pitching. Built a family workspace and companion-tablet app for older people, with shared memories, routines, voice interaction and revocable tablet access.

TokenMaxxer | AI usage dashboard

Jun - Aug 2026

React | TypeScript | Tauri | Rust

Developed a desktop dashboard for provider quotas, balances, reset times and usage history. Published Windows, macOS and Linux preview packages, with platform-native credential storage and automated release checks.

LEADERSHIP

Surrey Business Society | President

Oct 2025 - May 2026

Also Media Secretary; previously Vice President, May - Sep 2025

Led a 330+ member society and ten-person committee, overseeing events, communications and work with Surrey Business School and the Students' Union. Delivered the website and joint promotional content; supported the GenZ Immersive Technologies Summit as a promotional partner society.

Surrey Artificial Intelligence Society | President

May 2026 - present

Created the society website, branding, launch content and development plan for 2026/27.

Surrey Neurotech Society | Vice President

May 2026 - present

Built the society website and its development plan for 2026/27.
